

Example Open-ended task evaluation

Task: slide generation

Create a quarterly-review slide for live discussion.

Explain growth and margin pressure.

A Clear main message

B Richer analysis

Human preference

$A > B$

Initial evaluator

$B > A$

Overweights detail

Observed behavior Early direction switching

Initial evaluator

$\times B > A$

$\times B > A$

$\times B > A$

Detected

Colors agree

Labels readable

Use diagnosis in scoring

Weight clarity for live use

$\checkmark A > B$

Not explored

EvalOpt Depth-first evaluator evolution

Initial evaluator

Detect competing focal points

Detected, but not scored

$\times B > A$

Use diagnosis in scoring

Detail still outweighs clarity

$\times B > A$

Weight clarity for live use

$\checkmark A > B$

same direction
