

a Task: evaluate image edits

Make a rainy night; keep the street layout and buildings unchanged.

Source

A

B

Layout preserved

More vivid, but wider

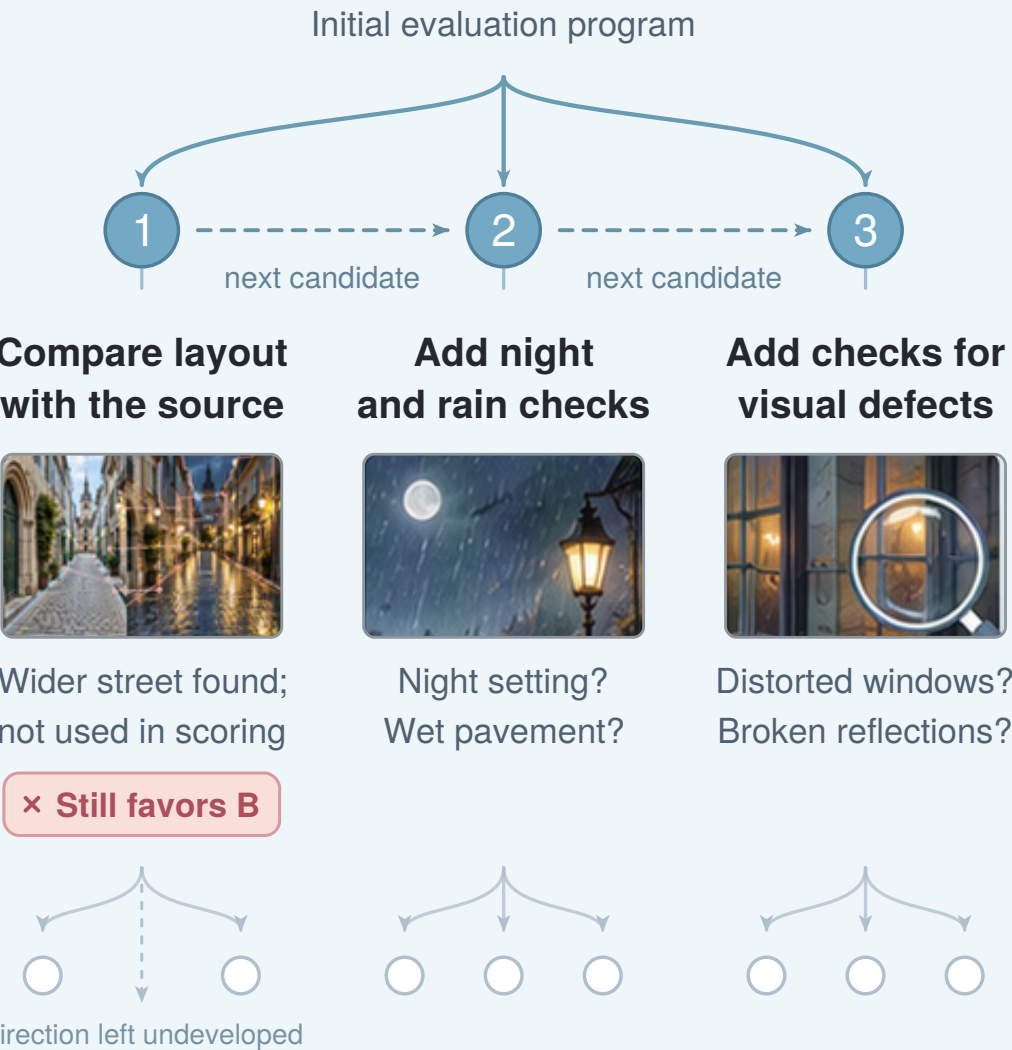

✓ **Human prefers A**

✗ **Scores favor B**

Each edit is scored separately.

b Default setup

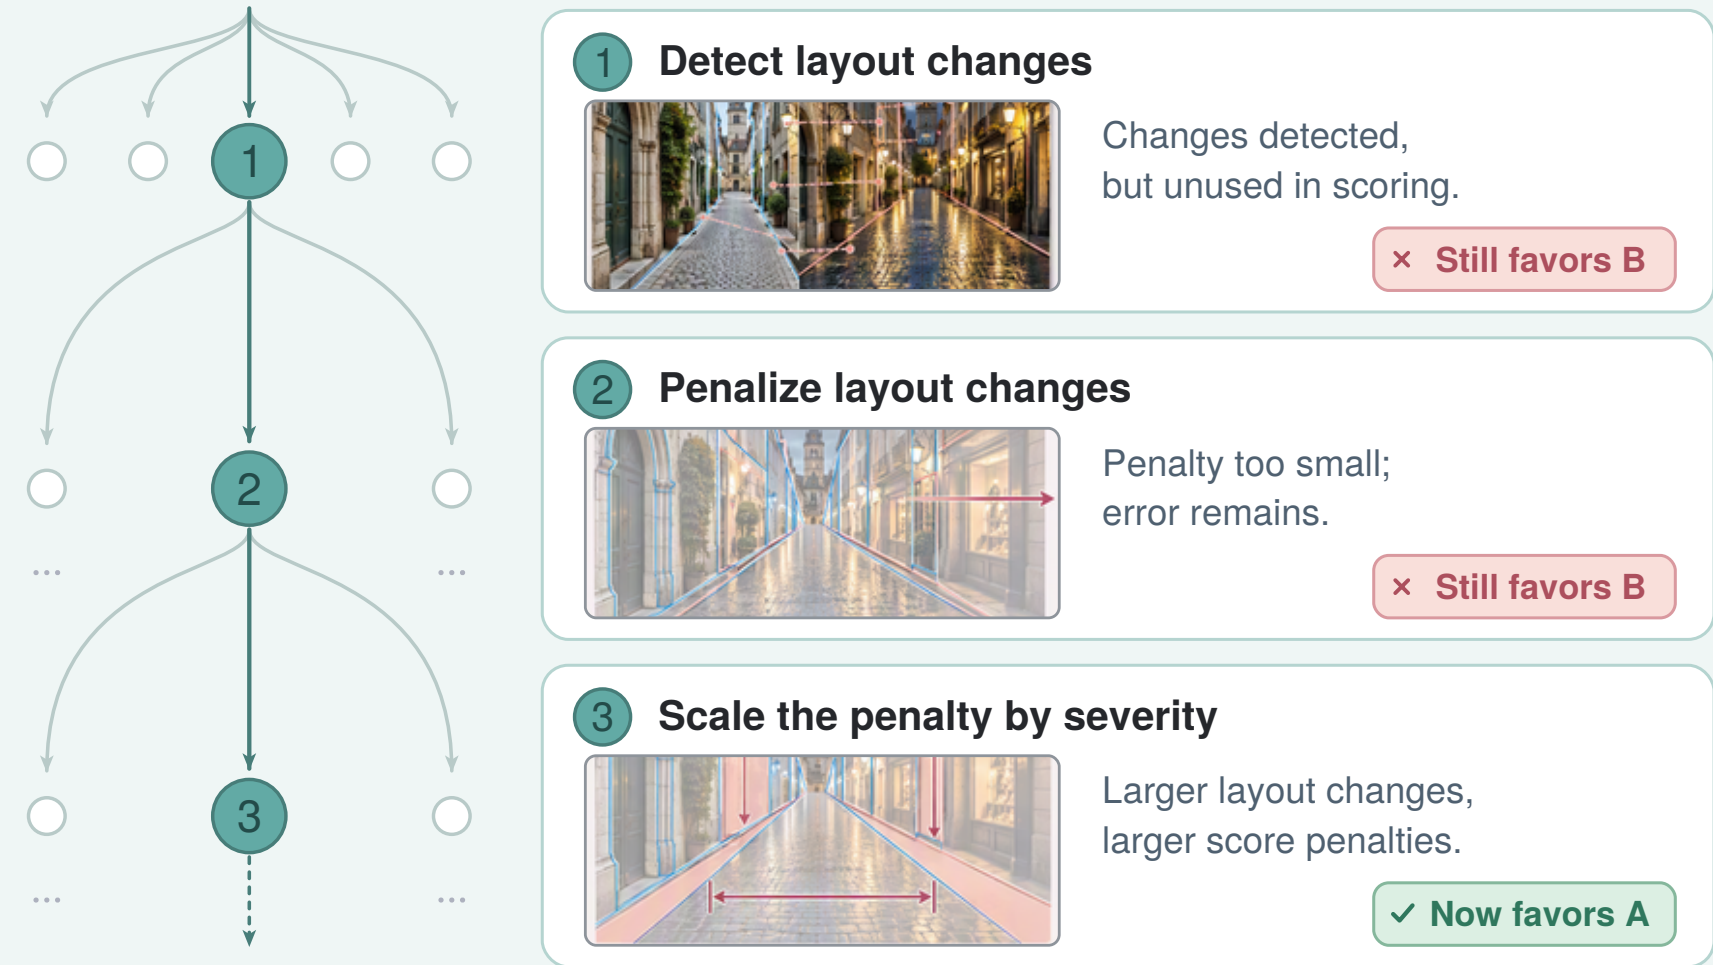

Try a different direction

c IterEval: depth-first evaluator evolution

Continue one direction: layout fidelity

Candidate acceptance and program inheritance are checked separately.
Initial evaluation program

Illustrative search paths. Nodes are complete evaluation programs; images stay fixed.
