

a Task: evaluate edits

Make a rainy night.
Keep the street layout and buildings unchanged.
Each edit is scored separately.

	A	B
Layout fidelity	Preserved	Wider street
Visual richness	Less vivid	More vivid
Human: A > B		≠
		Evaluator: B > A

b Default setup

Try a different direction

c IterEval: depth-first evolution

Continue one direction: layout fidelity

Illustrative search paths. Nodes are complete evaluation programs; images stay fixed.
