

## Preference

Make it a rainy night;  
keep the street layout.

## Source

## A: Layout kept

## B: Vivid, wider street

|           |         |
|-----------|---------|
| Human     | $A > B$ |
| Evaluator | $B > A$ |

## c EvalOpt: continue the direction

Found; not scored

**⊗ B > A**

**⊗ B > A**

**⊗ B > A**

## Detect layout changes

Found; unused  
in scoring

**⊗**  $B > A$

## Make the change count

Small change  Penalty 

Large change 

Same penalty,  
different severity

**✗  $B > A$**

## Weight by severity

Small change  Penalty 

Large change 

## Severe errors outweigh detail

✓  $A > B$

## Use what each attempt leaves unresolved

Illustrative paths; marks indicate local ranking agreement, not candidate acceptance.
